

GU RANGE

A vacuum cleaner you can trust

- Upright vacuum cleaners

The brush is easily accessed without the need for tools for easy replacement, maintenance and cleaning

Easy access to suction hose for removal of any blockages that may arise

The dust bag is 'universally' sized and is easy to interchange

Features that you expect from a leader

Designed better to clean faster

An upright vacuum cleaner represents walk-and-clean convenience, and for carpeted flooring in particular, there is no better answer.

Incorporating all the latest technology that one expects from a market leader, the Nilfisk GU series of uprights is designed to clean quickly, quietly and efficiently. With high-grade filtration and a HEPA filter option on all models, these upright vacuums secure a good indoor air quality. They can be used for offices and hotels as well as in hospitals, nursing homes and elderly-care facilities.

Easy to use, easy to handle, and built to withstand the inevitable knocks of everyday use, the Nilfisk GU series takes upright vacuuming to a new level of efficiency.

- Easy to use and operator friendly, these upright vacuums are lightweight and have a carrying handle for easy transfer from room to room
- Flat to the floor design for cleaning under furniture
- On-board extension hose and tube for cleaning hard-to-reach areas
- Durably built for longer working life
- Full access to brush and airways for easy cleaning
- Low noise level makes cleaning easy at any time, even in sound-sensitive areas
- Excellent filtration system, HEPA available for all variants, means that even the tiniest dust particles are trapped for good indoor air quality
- Adjustable brush height to suit all floor surfaces

A HEPA 13 filter is optional for all models in this series so that the machine can be used where maximum dust filtration is required

Indicators guide the user

Reliability is also our mantra when it comes to service

A Nilfisk machine functions optimally when cared for by regular service and maintenance visits. Therefore we have created the optimal service solution: three levels of service reflecting different requirements and an optional supply of a substitute machine in critical situations.

Service Solutions Standard – Professional maintenance

Your contract encompasses two yearly maintenance visits and 48 hours response time. Breakdown visits and spare parts are billed separately.

Service Solutions Plus – Optimised performance

With the Plus solution you have a firm grip on your maintenance and repair costs while knowing that your performance is never compromised, only optimised.

Service Solutions Premium – Maximised uptime

If uptime is your absolute top priority and key concern, Service Solutions Premium is the best choice. A quarterly maintenance visit is included, and there are no sudden financial surprises.

On-board extension hose and tube for cleaning hard-to-reach areas →

The 15 metre cord is stored on the machine →

The beater brush height is adjustable so that best cleaning results can be achieved, regardless of floor type or condition →

← The handle is adjustable for full operating convenience

← The dust bag is easily accessed for quick and simple changing. An extra dust bag is stored in the machine

← The HEPA filter compartment is fully accessible for convenience

← Flat brush head cleans close to wall and under furniture
